## **SYRINGE & SAFETY NEEDLE COMBINATION (1", STERILE)**

12 mL, 18 Gauge

**DESCRIPTION:** This syringe and needle combination is a needle-based safety device pre-attached to the syringe that protects the healthcare worker from accidental needle-stick injuries. The pre-attached combinations save valuable nursing time and improve clinical efficiencies. The product is easy to use and the robust safety shield ensures clinicians, patients, and workers receive protection from a sharps injury.

### **FEATURES:**

- ✔ Needles "pre-attached" to syringes
- ✔ Needle-based safety technology
- ✔ Latex-free
- ✔ Intuitive, one handed activation
- ✔ Bevel orientation, so that is safety shield is up, the needle bevel is up
- ✔ Self-leveling needle sheath allows clinician to use the OSHA-recommended technique for passive recapping of the safety needle
- ✔ Ultra sharp, tri-beveled, anti-coring needle minimizes trauma to muscle tissue for smooth delivery of medications
- ✔ Extended syringe finger flanges offer the clinician better grip and feel of syringe during medication delivery and clinical practice
- ✔ Compatible with any standard luer lock syringe
- ✔ Low dead space
