PRODUCT NO.: 6489

pH ELECTRODE, SENSOREX (pH 0 – 14)
Epoxy Body, Bulb Style, Single Junction, BNC Connection

DESCRIPTION: This pH electrode is a rugged and reliable chemically resistant combination pH sensor for more demanding general use pH measurements. It's sealed gel filled design requires no refilling. It is ideal for laboratory or field use. It is compatible with all pH meters accepting a BNC connector.

Comes with a one-meter cable and BNC connector.

FEATURES:

-  Durable epoxy body construction and recessed protected pH glass
-  Reliable and accurate over the full range of pH measurements (0 – 14 pH)
-  No refilling or maintenance required with sealed gel-filled design
-  Instantly ready for use and shipped in storage bottle for long shelf life – guaranteed for one year

TECHNICAL SPECIFICATIONS:

Dimension, Ø x L (mm / in)	12 x 150 / 0.5 x 6
Reference Solution	3.5 M KCl
Junction Material	Pellon
Glass Shape	Bulb

ADDITIONAL INFORMATION:

WARRANTY: 1 year
