SHARPSAFETY CHEMOTHERAPY CONTAINER, COVIDIEN (2 Gallon)

Polypropylene, Yellow w/Hinged Lid

DESCRIPTION: This container is used for disposing of chemotherapy waste. It can accommodate different sizes of waste materials and sharps, including syringes, ampules and prep materials.

FEATURES:

- Sealing gasketed lids provide leak-resistant containment of fluid
- Absorbent pad inside of container. This helps to absorb any excess liquid
- Container locks ensure security for final disposal
- The containers can be nested on each other saving valuable storage space
- Molded handles for secure transport
- The container is yellow in color making it highly identifiable as chemotherapy waste
