

PRODUCT NO.: 9237

STOPPER W/PRONGS (3 Prongs, 20mm, Gray)
Bromobutyl, Siliconized

DESCRIPTION: This all-purpose design for lyophilization applications reduces the possibility of legs sticking to each other. The stopper prongs lock into the interior of the vial neck, providing a tight seal and keeping the stopper from backing out.

FEATURES:

- Manufactured from the highest quality raw materials
- Components manufactured to yield exceptional dimensional stability
- 3-Prongs provides increased stability during lyophilization and resists cocking
- Free of latex, nitrosamines and 2-MCBT (2- mercaptobenzothiazole)
- Very well suited for ready-for-sterilization and ready- for-use applications
- Autoclavable

TECHNICAL SPECIFICATIONS:

- Durometer: 46
- Style: 3-Prong Lyophilization
- Rubber Material: Gray Bromobutyl, Siliconized
